

DRYLAND DYNAMICS: EXPLORING DESERTIFICATION STATUS IN THE DRYLANDS OF SOUTH PUNJAB, PAKISTAN

22 May 2024
12.00 CET

Join us for an impactful webinar dedicated to shedding light on the urgent issue of desertification in the drylands of South Punjab, Pakistan. Our seminar aims to offer insight into the extent, causes, consequences, and potential solutions to desertification in this crucial region.

In this webinar, we will present findings across several domains:

- Mapping the extent and severity of desertification in the region
- Uncovering the root causes and underlying factors driving desertification
- Understanding the multifaceted impacts on ecosystems, agricultural productivity, and communities
- Exploring the adaptive strategies employed to mitigate the adverse effects of desertification and build sustainable futures

Nausheen Mazhar

Dr. Nausheen Mazhar, an Associate Professor at Lahore College for Women University, is renowned for her expertise in desert ecosystems, dryland ecology, and climate change. She's a member of the Punjab Climate Change Policy's Panel of Experts and has contributed to the IPCC's 6th Assessment Report. With numerous academic accolades and a fervent commitment to activism, she has been a keynote speaker at various prestigious conferences and seminars and has remained a tireless advocate for sustainable solutions to climate challenges.
